

Yeriko Vargas

Data Science Consultant | Python | Statistics | Machine Learning

Detroit, MI
yeriko@email.com
https://linkedin.com/in/yeriko_vargas
<https://github.com/yeriko>

Applied statistician and data scientist specializing in predictive modeling, analytics pipelines, and automation using Python. Experienced building scalable data workflows and helping students and businesses understand data-driven decision making.

Consulting Projects

Project	Tools	Description	Link
Retail Demand Forecasting	Python / Prophet / Pandas	Forecast demand for retail products using time series models.	https://fake-link.com/project/forecasting
Vehicle Pricing Analysis	Python / SQL	Built pricing anomaly detection model for automotive market data.	https://fake-link.com/project/vehicle-pricing
Customer Segmentation	Python / Scikit-learn	Clustered customers based on purchase behavior.	https://fake-link.com/project/customer-segmentation
Financial Time Series Modeling	Python / Statsmodels	Modeled stock returns and volatility patterns.	https://fake-link.com/project/financial-modeling
ETL Analytics Pipeline	Python / Airflow	Automated data ingestion and analytics reporting pipeline.	https://fake-link.com/project/etl-pipeline

Machine Learning Projects

Project	Tools	Description	Link
Fraud Detection Model	Python / Random Forest	Predict fraudulent financial transactions.	https://fake-link.com/project/fraud-detection
Sales Prediction Model	Python / XGBoost	Forecast future product demand using historical sales data.	https://fake-link.com/project/sales-prediction
Recommendation Engine	Python / Collaborative Filtering	Recommend products based on user similarity.	https://fake-link.com/project/recommendation-engine
Customer Churn Prediction	Python / Logistic Regression	Predict customers likely to leave subscription service.	https://fake-link.com/project/customer-churn
Price Optimization Model	Python / ML	Estimate optimal pricing strategies using ML models.	https://fake-link.com/project/price-optimization

Data Analysis Projects

Project	Tools	Description	Link
---------	-------	-------------	------

SQL Data Warehouse Analysis	SQL / Python	Query and analyze warehouse scale datasets.	https://fake-link.com/project/sql_warehouse
Marketing Campaign Analysis	Python / Pandas	Analyze campaign performance and ROI.	https://fake-link.com/project/marketing
Automotive Market Trends	Python / Visualization	Analyze vehicle sales and demand patterns.	https://fake-link.com/project/automotive
Customer Behavior Analysis	Python / Pandas	Understand purchasing patterns and user activity.	https://fake-link.com/project/customer
Operational KPI Dashboard	Python / BI	Track business performance metrics.	https://fake-link.com/project/kpi_dashboard

Python Automation Projects

Project	Tools	Description	Link
Data Cleaning Automation	Python	Automate messy dataset processing pipelines.	https://fake-link.com/project/data_cleaning
File Processing System	Python	Batch processing pipeline for large datasets.	https://fake-link.com/project/file_processing
ETL Script Generator	Python	Generate reusable ETL pipelines.	https://fake-link.com/project/etl_script
API Data Collector	Python	Collect and process external API data.	https://fake-link.com/project/api_collector
Automated Reporting Tool	Python	Generate PDF and CSV reports automatically.	https://fake-link.com/project/reporting

Tutoring Topics

Project	Tools	Description	Link
Python for Data Science	Teach Pandas, NumPy, and data science concepts.	https://fake-link.com/tutoring/python	
Statistics Fundamentals	Regression, probability, hypothesis testing.	https://fake-link.com/tutoring/statistics	
Machine Learning Basics	Supervised learning and model evaluation.	https://fake-link.com/tutoring/ml_basics	
SQL for Analysts	Database querying and joins.	https://fake-link.com/tutoring/sql	
Data Science Interview Prep	Technical interview preparation.	https://fake-link.com/tutoring/interview_prep
